BioMAS G	25 lb Pail	BIOMAS G	$800.00	Pail

BIO MAS Benefits

Bio Mas is a unique blend of plant-derived amino acids, plant hormones, humic and fulvic acids, cytokinins, carbon, stimulants, and numerous beneficial elements for optimal plant growth and vigor.

Features and Benefits

- Bio Mas G is specifically formulated to provide enhanced plant health for turfgrass.
- Increases photosynthesis even in low or poor light conditions.
- Heavily stimulates root growth and mass.
- Increases uptake and utilization of fertilizers.
- Increases microbial activity.
- In conjunction with a normal fungicide spray program, Bio Mas will enhance overall disease control, resulting in turf that is more resistant to disease and better prepared to recover from disease damage.
- Helps turf overcome stress, even in shady areas or cloudy weather.
- Visual difference in turf health within 2-3 weeks.

- Comes in a convenient 25lb pail.

Bio-Más G

Net weight 25 Pounds

Bio-Más G is a unique blend of plant derived amino acids, plant hormones, humic and fulvic acids, cytokinins, carbon, stimulants and numerous essential and beneficial elements for optimal plant growth and vigor.

Disclaimer: It is impossible to test this product on all turfgrasses, ornamental and annual plantings. Therefore, eliminating all risks of usage associated with this product is not possible. Before treating, a preliminary trial is suggested on a small scale before a full treatment is applied. Wait 5 to 7 days after treatment to evaluate results. **Bio-Más G** may be tank mixed with many commonly used fertilizers, including micro-nutrient combinations. If **Bio-Más G** is tank mixed with commonly used agricultural herbicides, fungicides, insecticides and plant growth regulators the end user assumes all responsibility for any damage or injury that may occur. A compatibility "jar test" should be evaluated prior to tank mixing any product with **Bio-Más G.**

Bio-Mas Mitigates Root Pruning:
