### DIRECTIONS FOR USE and FOLIAR APPLICATION RATES

Add **Grigg Brothers Ultraplex™** to any **Grigg Brothers** foliar application at the rate of 3 fl. oz. per 1000 sq. ft. **Ultraplex** contains micronutrients. **Ultraplex** is a unique formula, no additional surfactant is required. For optimum plant health; mix **Elicitor** at the following rates with **Grigg Brothers Ultraplex** at their recommended rates and apply to your turf.

**IMPORTANT:** For best results apply as a foliar spray early in the morning or late evening. Allow to dry on plant 3-6 hours before irrigation. Apply with 1-2 gallons of water per 1000 sq. ft.

**COOL SEASON TURF GRASS:** As a foliar, maintenance rate 1-3 oz. per 1000 sq. ft. weekly or as needed.

**WARM SEASON TURF GRASS:** As a foliar, maintenance rate of 2-4 oz. per 1000 sq. ft. weekly or as needed.

**SMALL AREAS:** in greenhouses, flower gardens and ornamentals, dilute **Elicitor** 200 times and thoroughly wet the foliage. Repeat every two weeks or as need.

Foliar fertilizer is intended as a supplement to a regular fertilization program and may not, by itself, provide all the nutrient normally required by crops or other intended plants.
