Renovate Plus™

## DIRECTIONS FOR USE

### Aerification

Renovate Plus is a recommended aerification product. A wide range of application rates can be made depending on the desired outcome. Recommended rates are 10 to 25 pounds of product per 1,000 sq. ft. dragged into aeration holes followed by watering the soil surface.

### Sod & Seed Establishment

Apply Renovate Plus directly to the soil surface and scarify into the top inch or two of soil. Recommended rates are 10 to 25 pounds of product per 1000 sq. ft.

### Sand Construction Amendment

Up to 800 pounds of Renovate Plus per 1000 sq. ft. worked into the top 6 to 8 inches of sand is recommended for sand root zone construction. A complete chemistry soil testing protocol should accompany all construction programs including a particle size analysis.

### Lawn Care and Turf Maintenance

Apply 10 to 25 pounds of product per 1000 sq. ft. as a top dressing ideally accompanied with surface spiking. On the weakest areas use the higher rates and water in thoroughly.

### Ornamental Planting

Renovate Plus is a recommended planting amendment for woody ornamentals, perennials and annuals. Apply 1/2 to 1 cup per potted plant per 1 gallon container.

### Guaranteed Analysis

Total Nitrogen (N)..... 1.0%  
0.5% Water Soluble Nitrogen  
Available Phosphate (P<sub>2</sub>O<sub>5</sub>) ..... 0%  
Soluble Potash (K<sub>2</sub>O) ..... 1.0%  
Calcium (Ca) ..... 5.0%  
Iron (Fe)..... 2.0%

### Ingredients:

Compost, kelp, bone meal, greensand, rock phosphate, calcium sulfate, zeolites, humates.
